journal of MEMBRANE SCIENCE

Subject Index

Absorption, 229
Air separation, 155
Aliquat-336, 147
7-Aminocephalosporanic acid, 147
Amphiphilies, 219
Anion exchange membranes, 161
Antibiotic extraction, 209
Antibiotic recovery, 209
Aqueous sodium hydroxide, 161

Backwashing optimization, 241
Bipolar membrane, 199
Bubble point extended methods, 1
Bulk liquid membrane, 147

Cake filtration model, 287
Cake formation, 171
Ceramic hollow fibre, 85
Charged membrane, 219
Cobaltporphyrin, 155
Co-ion leakage, 199
Composite membranes, 105
Concentration levels, 199
Concentration polarization, 75, 249
Counter transport, 147
Crossflow, 287
Crossflow filtration, 241

Density, 275
Diffusion, 229
Diffusion coefficient, 275
1,4-Dioxane, 41
Dynamic membrane, 287

Electrodialysis, 199
Electroosmotic separation, 41
Erythromycin, 209
Erythromycin extraction, 209

Facilitated transport, 147, 155
Fiber membranes, 229
Fixed carrier membrane, 91
Flux decline, 171
Fouling, 171

Gas separations, 115, 185, 229

Hagen–Poiseuille gas flow, 1
High temperature, 161
Hollow fiber modules, 229
Hydraulic resistance, 287
Hydrogen-bonding interaction, 91

Inorganic membranes, 105

Knudsen flow, 1

Laminar flow, 249
Liquid membranes, 13, 209

Macrovoid, 29
Manganese dioxide, 287
Membrane cascades, 115
Microfiltration, 171, 241, 249, 287
Microporous and porous membranes, 1, 13, 85
Module, 115
Module hydrodynamics, 47

Nanofiltration, 263
Nernst–Planck, 263

Optimization of module configuration, 185
Organic separations, 13
Osmotic pressure, 29

Permeability, 275
Pertraction, 209
Pervaporation, 91
Phase separation, 29
Plasmapheresis, 249
Polyacrylonitrile, 219
Polymer membrane, 155
Polyoxyethylene grafting nylon 6 membrane, 91
Polyphosphazene, 105
Poly(trimethylsilyl norbornene), 275
Poly(vinyltrimethyl silane), 275
Pore size, 263

Pore size distributions, 1
Preparation and characterization, 85
Process prediction, 263
Protein aggregates, 171
Protein fractionation, 75
Protein transmission, 47, 75

Quaternized ammonium salt, 219

Reduction of oxygen, 155
Rejection, 263

Selective separation of cyclohexanol, 91
Separation factor, 75
Solubility and partitioning, 13
Solution environment, 47
Spinodal decomposition, 29
Standard law of filtration, 287

Tritiated water, 105

Ultrafiltration, 47, 75, 105, 219

Vitrification, 29
Vortex flow filter, 47, 75

Wastewater treatment, 287
Water solution, 41
Water treatment, 13
